1. Project Overview

Library Management System

A smarter way to organize, manage, and access library resources.
Shelf Life is a web-based Library Management System developed as part of COMP229 – Web Application Development at Centennial College. The project aims to simplify everyday library operations by providing a centralized platform for managing books, library members, and borrowing activities. Our goal is to develop an organized, user-friendly application that makes library management more efficient while providing users with an easier way to explore and access library resources.

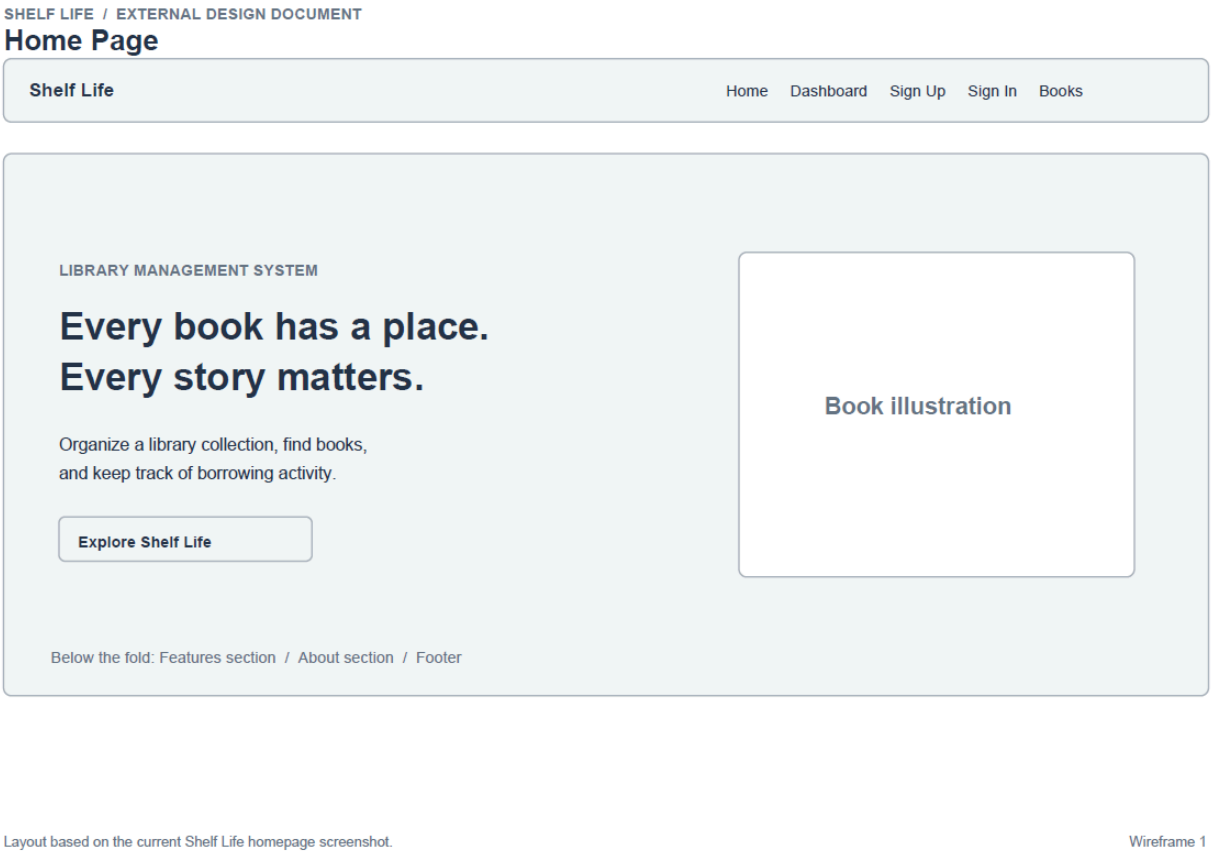

2. System Features

The first release includes the following features:

- User registration and sign in
- Role-based access (Member and Admin)
- Dashboard for managing account and library activities
- View, add, edit, and delete books
- Responsive and simple user interface

3. Wireframes

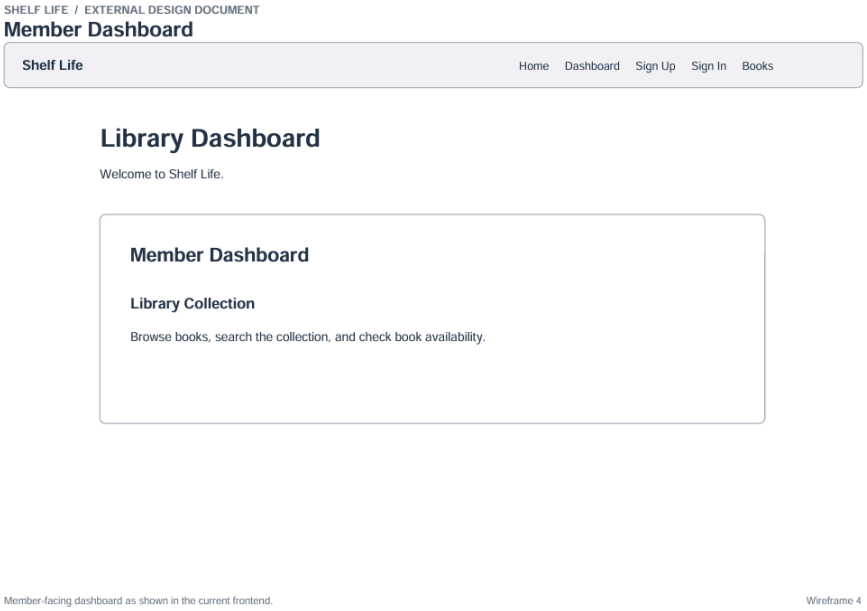

3.1 Home page

Layout based on the current Shelf Life homepage screenshot.

Wireframe 1

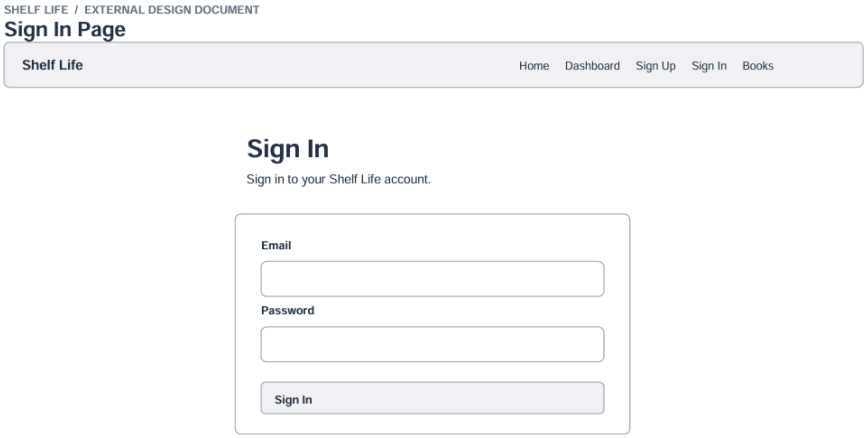

3.2 Dashboard

Member-facing dashboard as shown in the current frontend.

Wireframe 4

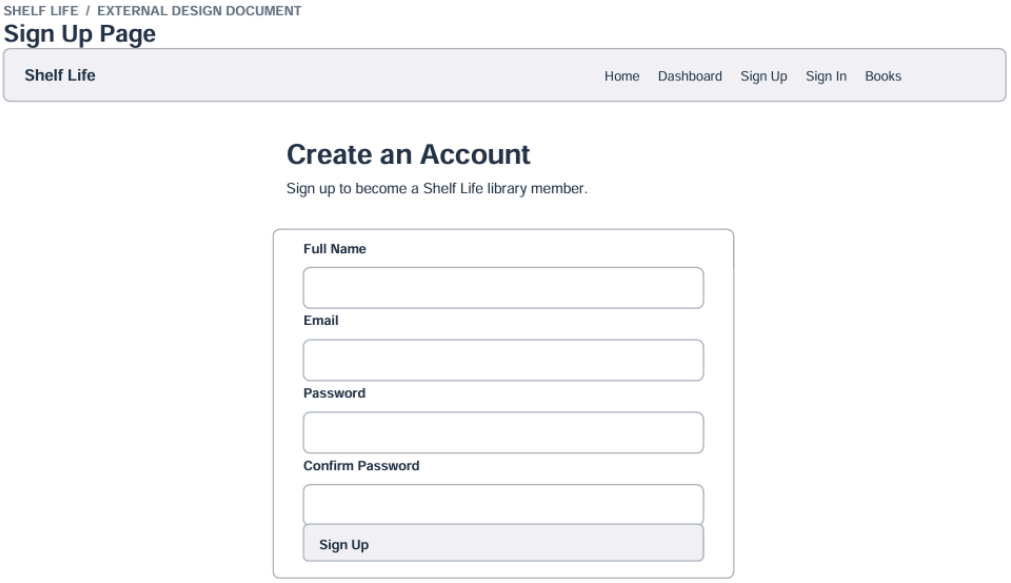

3.3 Sign-in page

Login form with email, password, and sign-in button.

Wireframe 3

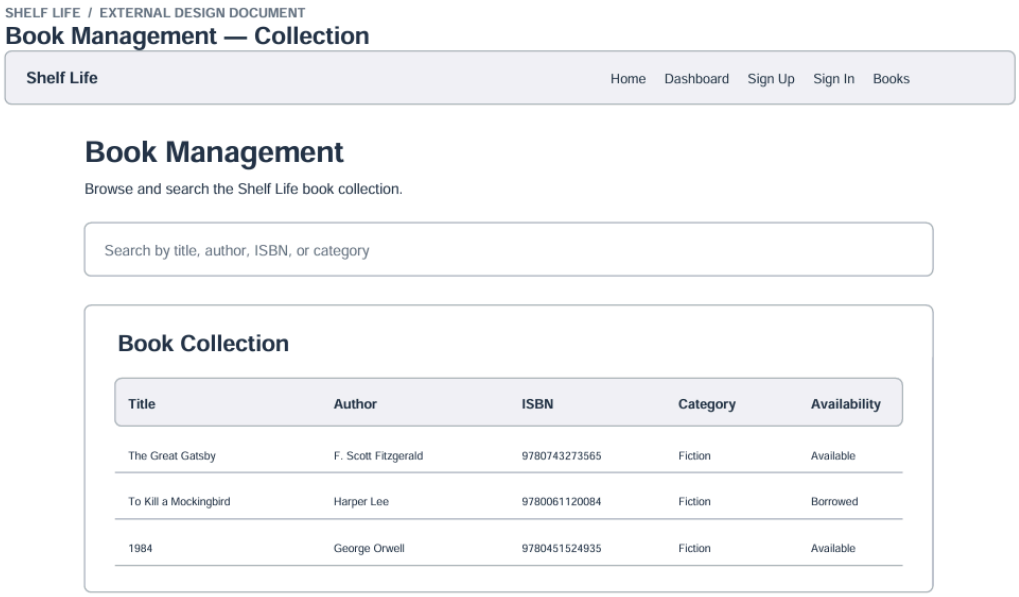

3.4 Sign up page

Registration form: name, email, password, confirmation, and submit button.

Wireframe 2

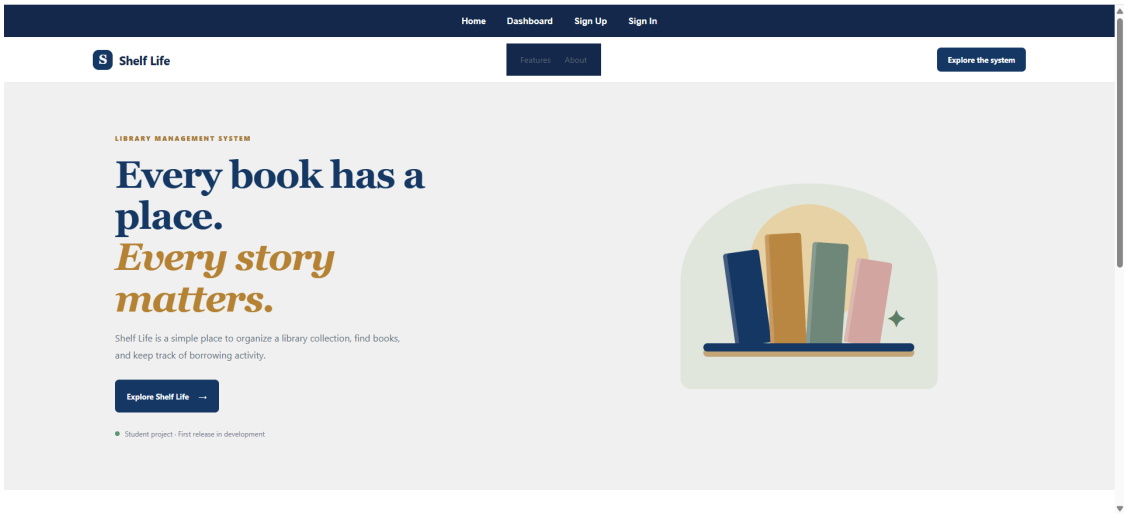

3.5 Book Management

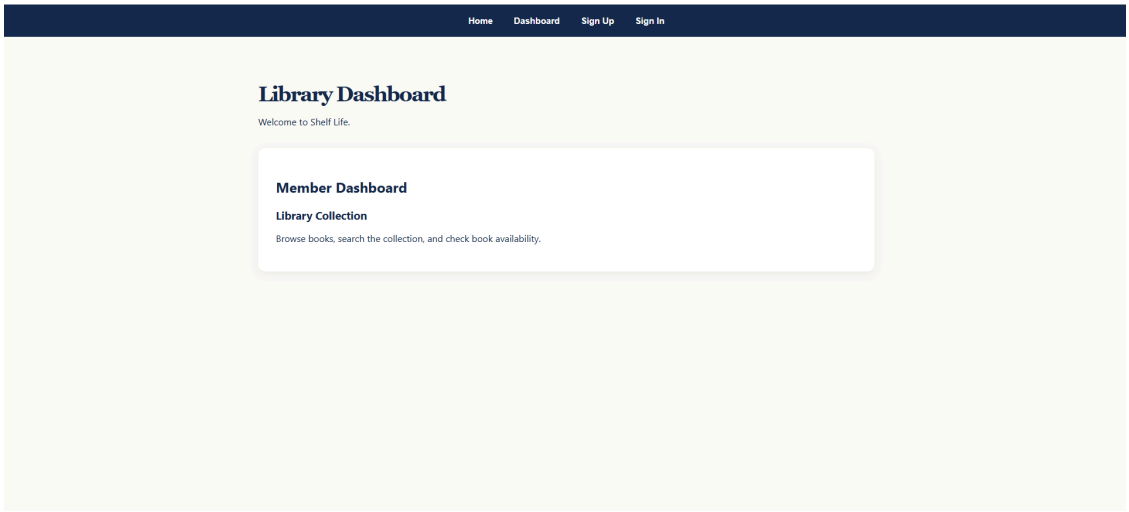

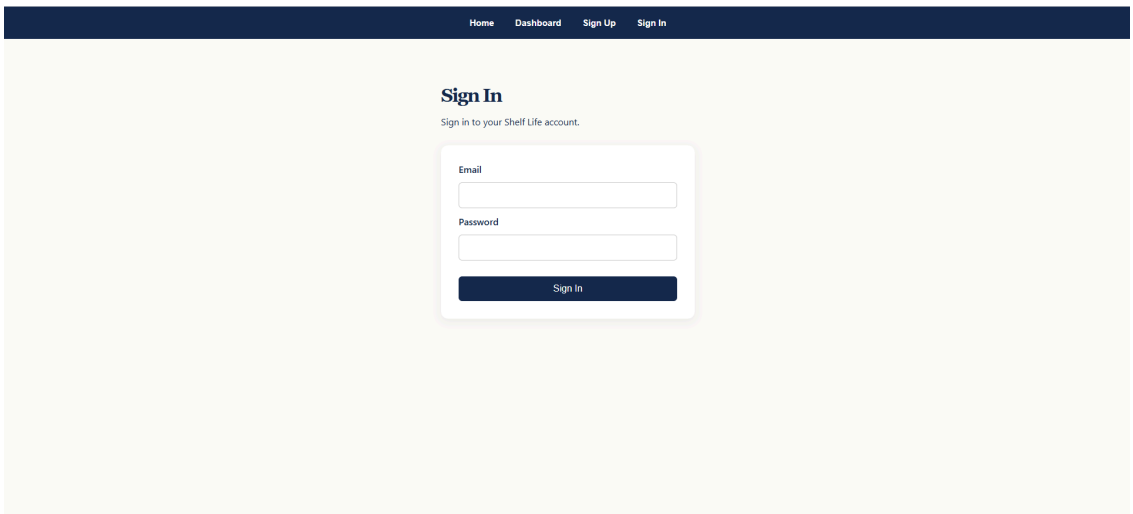

Search and book collection view; currently populated with sample book data.
